- ❖ Involved in code reviews.

Project Name : Internal

Environment : Windows

Tools Used : Angular, Java, Spring boot

Role and Responsibilities:

- ❖ Application development using Angular and Spring Boot.
- ❖ Building RESTful APIs with Spring Boot.

College Project:

➤ **Mobile based Bus Ticketing System**

➤ **Sponsored By:** Persistent Systems Ltd. Technologies

➤ **Technologies:** Java, Android, Firebase

➤ **Description:**

- ❖ An Android application to provide hassle-free travel for daily commuters on public transport. This application will be used to minimize the process of issuing bus tickets. The application will also allow passenger to pay through wallet.
- ❖ The ticket request is generated in the form of QR code at the customer's end. The conductor scans the QR code and thus ticket is generated. Firebase was used as database.

➤ **Cloth Inventory System**

➤ **Technologies :** Java MySQL

➤ **Description:**

- ❖ A college-level mini project to understand the basic CRUD operations. It consists of dashboard that allows access to only authorized user. It allows new record insertion, updating existing records and deletion. The technologies used were JAVA and MYSQL.
