Working with a team of developers and programmers to meet daily project goals and specified deadlines as well as providing technical support by troubleshooting issues, and monitoring design changes in existing web applications

💼 Work Experience

•	Organization	:	**MBit Computraining Pvt. Ltd**
•	Duration	:	26-Oct-2021 To 20-May-2022
•	Client	:	ARMS
•	Technology	:	C, C++, Asp.Net, C#, HTML, CSS, JAVA Script
•	Tools	:	Visual Studio Professional 2019. Database
•	Database	:	SQL Server Database, Teradata

Responsibilities:

- Interpreting written business requirements and technical or functional specifications as well as designing, developing, evaluating, and implementing web applications using ASP.NET framework
- Designed and developed user interfaces using Windows forms for Desktop application and Web forms using ASP.Net for web application
- Gathered requirement by client and developed the design
- Providing application maintenance for clients' websites as well as participating in the technical design, development, testing, and implementation of website enhancements
- Planning and conducting system tests and monitoring test results to take appropriate actions as well as providing guidance and leadership to new and less-experienced programmers or other technical staff
- Working with a team of developers and programmers to meet daily project goals and specified deadlines as well as providing technical support by troubleshooting issues, and monitoring design changes in existing web applications

💼 Work Experience

•	Organization	:	**Uniglow Infotech Pvt. Ltd.**
•	Duration	:	10-July-2019 To 25-Oct-21
•	Client	:	48th IPS National Conference
•	Technology	:	Asp.Net, C#, HTML, CSS, C, C++
•	Tools	:	Visual Studio 2013,10. Database
•	Database	:	SQL Server, Database Access

Responsibilities:

- Met with the company's clients developed the design framework for the respective websites by collecting information on the client's business goals and objectives
- Interpreting written business requirements and technical or functional specifications as well as

designing, developing, evaluating, and implementing web applications using ASP.NET framework

- Designed and developed user interfaces using Windows forms for Desktop application and Web forms using ASP.Net for web application.
- Providing application maintenance for clients' websites as well as participating in the technical design, development, testing, and implementation of website enhancements
- Planning and conducting system tests and monitoring test results to take appropriate actions as well as.
- providing guidance and leadership to new and less-experienced programmers or other technical staff
- Working with a team of developers and programmers to meet daily project goals and specified deadlines as well as providing technical support by troubleshooting issues, and monitoring design changes in existing web application

Work Experience

- Organization : **Antara Technology Industrial**
- Duration : 15-Jan-2018 To 19-Feb-2019
- Technology : Asp.Net, C#, HTML, CSS
- Tools : Visual Studio 2013,15
- Database : MS SQL, SQL Server
