PERSONAL PROJECT DELIVERED

- **Verbia : (Online Interview Platform)**

Concept: Verbia is an Online Interview Platform developed for Recruiters and Candidates.

The recruiters given a dashboard to register candidates by adding details like candidates' details along with the position & department for which they are being hired. Recruiters can create an interview question bundle from Verbia's question bank and email it to the candidate. When a candidate clicks the link, there will be some instructions and then Verbia's system will start asking interview questions and the candidate will answer them. The system will record and upload each answer. Once the last question is submitted, the recruiter will receive an alert and they can review or download the interview.

Technology Used : Python, Django, HTML, CSS, JS, JQuery, Bootstrap, Photoshop

- **My Food Cart (Online Ecommerce Platform) :**

Concept: This is a food delivery website that helps users to order food from online stores.

Users can browse the website and can order food from the online store. Before placing an order, the user has to sign-up on the website or sign-in. The user will have one payment option online payment, user is redirected to payment gateway (Instamojo) online payment gateway. After having successful payment user will be redirected to the order confirmation page with order ID. Order details will reflect in the Store and Admin dashboards. Store and Admin process the order and update the order status which will reflect on the user's order history.

Technology Used : Python, Django, HTML, CSS, JS, JQuery, Bootstrap.
