

## PRAVEEN Y KOTEKAR

Email: [kotekarpraveen@gmail.com](mailto:kotekarpraveen@gmail.com)

Date of Birth: 26<sup>th</sup> Nov 1990

Contact No: +91-8951 339 695

Open to Relocation

### CAREER OBJECTIVE

To become a successful professional in a highly competitive technological world where performance is rewarded with new challenging responsibilities and to serve a reputed growth oriented industry in the field of Design, Development and Maintenance.

### EXECUTIVE SUMMARY

Possess 6.3 years of experience in Designing and Development of Database Driven Web Applications in Linux and Windows Operating System.

### TECHNICAL SUMMARY

- **Languages** : PHP 5.6 & PHP7, Node JS, Core Java.
- **Database** : MySQL, PostgreSQL, Versant DB.
- **Web Designing** : HTML5, CSS, JavaScript, JQuery, JSON, Ajax, Bootstrap.
- **Framework** : Laravel 5.4
- **Web Framework** : React JS, Express JS.
- **Web Services** : RESTFUL Web Services.
- **Cloud services** : AWS (EC2, S3, SNS).
- **Version Control** : GIT, SVN.
- **Version control tool** : GIT hub, Git lab, Bitbucket.
- **NoSQL** : Redis Memcache datastore, MongoDB.
- **Payment Gateway** : PayTm, TPSL (Techprocess), Citrus.
- **IDE** : Eclipse, Visual Studio code, Notepad++.
- **Tools** : MremoteNG, Putty, Amazon Workspace
- **Operating System** : Linux Ubuntu and Centos, Windows.
- **Others** : Exposure to IOT raspberry pi.
- **Other technical aspects:**
  - ✓ Excellent Object Oriented Programming, Developing multi-tier Applications by using **MVC Architecture**.
  - ✓ Having Exposure in Connecting AD Group with LDAP.
  - ✓ Configuring JMS Topic and consuming.
  - ✓ Having Exposure in setup Linux Cron Jobs and scheduling.
  - ✓ Good analytical abilities, quick grasping power and zeal for learning new things.
  - ✓ Self-motivated individual with good communication skills.
  - ✓ A commitment to quality and a thorough approach to the work.
  - ✓ Managing production release activities.

### EDUCATIONAL QUALIFICATION

- **B.E(ECE) (2013)** from **Vishveshwarya Technological University** with **64.10%** aggregate.
- **H.S.C. (2009)** from **Karnataka P.U Board** with **74.10%** aggregate.
- **S.S.C. (2007)** from **Karnataka State Board** with **88.32%** aggregate.

### PROFESSIONAL EXPERIENCE

- Senior software engineer(Fullstack developer), News technology services  
Bangalore(November 2018 to present)

- **Fullstack Engineer**, Mobiotics Pvt Ltd Bangalore (November 2016 to November 2018)
- **Software Engineer**, Intuitio Systems Pvt Ltd Hubli (February 2016 to September 2016)
- **Junior Software Engineer**, Aitison Software, Hubli (December 2014 to January 2016).

## PROJECT EXPERIENCE

### Project # 1

<b>Project Title</b>	: <b>Enterprise Methode Publishing System</b>
<b>Client(s)</b>	: NEWS UK
<b>Tools &amp; Server</b>	: Eclipse, Tomcat, Antipro, Maven, AWS- S3.
<b>Technologies</b>	: Java, Jsp/Servlets2.5, Spring4.0, Web Services, Hibernate4.2, PHP, NodeJS, ReactJS, JavaScript, CSS, JQuery, XML, JSON, Eclipse Indigo, Swing Rest Api's, Versant Database, EOMFS.
<b>Role</b>	: Software Developer
<b>Team Size</b>	: 12 members
<b>Period</b>	: December 2018 to till now

### Description:

Methode is a publishing platform EidosMedia Tool that provides web CMS, cross-channel publishing, news planning, advertising management, and workspace planning and tracking solutions. In addition, it enables users to open graphics from editorial environments in Photoshop and Illustrator applications before editing and saving them to the Methode database.

The end user of this tool is Editorial Team. In Methode we have 4 titles. That is, **Times**, **The Sunday Times** and **TheSun**, and **TLS**.

The weekly newspaper is called Times which is for 6days (i.e., Mon-Sat) and on Sunday it is called Sunday times.

Times and TLS are similar, but TLS will be published on Friday's.

And we have different titles associated with the titles. Print, web, Digital and syndication are the common channels between times and Sunday times.

Sun- we have only Print channel from Methode from TLS we have both Print and web.

**Print** > Where the customer reads the newspaper in a printed form

**Tablet** > Where the customer reads news on the tablet slots.

**Web** > Where the customer reads news on a web page.

The EDITORIAL team will prepare the page plan and chief editorial will approve the plan and it will go through Newswayx and it will go to print.

**CHP:** CHP is Content Hub publishers, it is database management system from where we get the stories, Images etc.

And that is integrated with Methode.

**Edition Builder:** This is web tool where editorial team will create the edition and that is integrated with method.

**Supporting applications:** CPW, Pubsys dashboard, Newstrack, MDPCplanning gate, Newswasplanning gate, Hub portals, Newsbeat, Newsboot.

### Responsibilities:

- Responsibilities include design, coding and implementation of the software application by utilizing java. Also design and develop the middleware services to meet the project and evaluate the new technologies.
- Involved creating configuration files based on the requirement and hibernate mapping files also.
- Understanding the user requirements, preparing requirements specification documents for all the enhancements proposed by the application user groups.
- Attending the daily status calls, tracking the issues rose in issue trackers (UAT) and sends the fixes on time.
- Verifying and reviewing the code check-ins in SVN, creating patches, building the daily kits.
- Implementing restful web services for Edition Builder Tool.
- Writing Junit Test cases.
- Managing Builds and deployments for all environments.
- Participating Production releases.
- Preparing cronjob and scheduling.
- Participating writing Automation Test Scripts.
- Building some tools for testing automation.
- Managing TGI Friday meetings.
- Created System Dictionary.
- Creating Topic Creation Tools using Swing Rest API's.

## **Project # 2**

**Project Title: Publication system dashboard - NewsUK**

**Team Size : 4**

**Description:** Pubsys Dashboard is a centralized application for many automation and monitoring scripts. This is used by the Publishing Systems onsite and offshore teams.

**Features:**

- A centralised page collectively for website links of the Publishing Systems Applications in different environments.
- Publishing Systems applications Fonts, Methode, CHP, Adobe AD Groups information.
- User search functionality and user data retrieval.
- Methode Crashlogs data which helps the team to analyse user specific and version specific crash reports of Methode application.
- Methode Client Installation stats which help the team to validate the Client releases
- CHP user session count and Servers status.

### **Roles and Responsibilities:**

- Took overall responsibility to build application from scratch.
- Created system flow design for most of the above modules.
- Perform business analysis and write specifications related to developed application.
- Guide junior software programmers.
- Create design documents and perform program coding and testing.
- Highly involvement in post-production troubleshooting and support.
- Participated in daily scrums, standups. Provided technical advice on bugs and enhancements.

**Environment:** PHP, MySQL, Node JS, ReactJS, MongoDB, JQuery, HTML5, CSS, Bootstrap3.

### **Project # 3**

**Project Title:** HITS and IMCL - Hinduja group of companies.

**Team Size :** 5

**Description:** Two way web portal for Local cable operator and Admin .This portal allows local cable operators to manage subscribe and subscription to activate the plans/packages. User and Admin both can see subscribed plans/packages and they can raise a ticket for any complaint regarding the services provided.

**Roles and Responsibilities:**

- Designed and implemented corporate web-pages and web applications.
- Create design documents and perform program coding and testing.
- Integrated multiple payment gateways like PayTm, TPSL (Techprocess), Citrus.
- Worked on data binding & custom templates using Angular4.
- Handled Server to Server responses for different payment gateways.
- Implemented mailing templates like SES and S3 bucket for uploading files in S3 storage.
- Implemented backend API's using REST web services from scratch.
- Well-versed with version control GIT commands for Bit bucket.
- Recently, I have converted an existing IMCL web portal into mobile compatible responsiveness.
- Managed to simultaneously work on multiple projects and modules without deviation.
- Maintained professional communication with clients.

**Environment:** PHP 7.2, MySql, Angular4, Javascript, Redis memecache, RabbitMQ.

### **Project # 4**

**Project Title :** Electronic Medical Records.

**Team Size :** 3

**Description :** This is an Android Application, developed for the electronic medical record collection for sharing to personal doctors or other hospitals doctors who are registered with this app. We are developing an application for Patient and Doctor Separately. Here in Patient App, patient used to save his prescription and any reports with full details of the doctors and hospital. Here he has the option to check for secondary opinion for his diseases or any health issues he has, so he can directly share his record with other doctors to take any further suggestions. In Doctor App, doctor can view patient record who have shared their record and reply to their queries. If the doctor has any doubts about the patient queries, he can share the record to other doctor to clear his doubts.

**Roles & Responsibilities:**

- Worked on REST API's to perform CRUD operations using HTTP methods.
- Created wire frames using online tools.
- Worked on generating charts using third party plug-ins like chart.js.

**Environment :** PHP, MySQL, JSON.

### **Project # 5**

**Project Title :** ERP for Production Manufacturing (Planning and Costing).

**Team Size :** 3

**Description :** This was the ongoing project for product manufacturing company. Aim of this project was to develop ERP application for production manufacturing company which

included several modules currently that are working in production planning and costing i.e. calculating the OEE (Overall Equipment Effectiveness) of the machines.

**Roles & Responsibilities :**

- OEE Calculation of Products with given inputs depend upon the machine capabilities.
- Generating a report on daily, weekly, monthly and yearly basis using TcPdf and PhpExcel plugins.
- Developed full set of modules like OEE calculation, Employee management, Shift management, Product and Machines management.

**Environment: PHP5, MySQL, Bootstrap 3, TcPdf, PhpExcel, JGraph.**

## PERSONAL DETAILS

**Name** : Praveen Y Kotekar  
**Father's Name** : Yallappa M Kotekar  
**Nationality** : Indian  
**Hobbies** : Playing Cricket and watching T.V.  
**Languages Known** : Kannada, Hindi and English  
**Present Address** : #86 1<sup>st</sup> floor 2<sup>nd</sup> main road 2<sup>nd</sup> cross JP nagar 2<sup>nd</sup> phase Bangalore - 560078  
**Phone Number** :+91-8951339695  
**Alternate Email** :[kotekarpraveen@gmail.com](mailto:kotekarpraveen@gmail.com)

## DECLARATION

I hereby declare that all information mentioned above is true to the best of my knowledge.
