Career Objective

To work in a learning and challenging environment, utilizing my skills and knowledge to the best of my abilities and contributing to the growth of the organization as well as up skill myself.

Experience Summary

Experience as a SAP Business Objects and Tableau developer for 3.5 years.

Employer Details

TATA Consultancy Services (TCS), Chennai
Oct 2017 - Present
Designation – System Engineer

Achievements

- Recognised for resolving the major issues, in delivering the business-critical reports without breaching SLA and for handling DST activity in both Onprem and Azure environment, and received "On the Spot" award thrice for the same.
- Appreciated by client, for migration of business objects suite from On Premise to azure environment successfully.

Professional Experience

1. **Project (Dec 2017 – Sep 2019)**

   SAP Business Objects Administrator, worked in production support. I analyse the data in the critical report in Retail domain and have checked the data in the backend system (SAP BW) and provided the necessary solutions to clients. Worked in SAP Hana studio in analyzing the HANA views, administration and in debugging the expensive hana statements using BO audit logs and restricting them, which ensures smooth database management. I have handled the issues with universe and bex queries, and resolved issues with connections in information design tools. I have also developed webi reports, scheduled and have handled promotion management.

2. **Project (Sep 2019 - Jan 2020)**

   We had a requirement to migrate SAP business objects to Azure, had contributed in setting up the application, and in successful migration. I have contributed in building up the BO landscape, Security access for users and in creation of Audit reports. More than 5000 BO reports, universe, connections, 2000 users, had been migrated to all environments including production.

3. **Project (Feb 2020 - May 2021)**

   I worked as a Tableau administrator - setting up permissions for users, monitoring the server, scheduling dashboards and extracts. I developed tableau dashboards, which were very critical for the client's business. Worked on providing and resolving issues related to user access, which includes creation of bulk users in the system. I have also worked on tabcmd.

Educational Qualifications

Course	Institution	University/ Board	Year	CGPA/ Percentage
B.TECH [Electronics & Communication]	Sri Manakula Vinayagar Engineering College	Pondicherry University	2017	9.04
HSC	Alpha Matriculation Higher Secondary School	State Board	2013	92.5
SSLC	Kendriya Vidyalaya No.1	CBSE	2011	8.8

Technology and Tools

- SAP business objects
- Hana studio - IDT
- CCM - CMC - Query Builder
- Tableau server - Tabcmd
