OBJECTIVE

Looking for software development opportunity to use my experience of creating application with wide range of skills and progress towards my goal of becoming an efficient and productive developer delivering quality software applications.

I am passionate about being a good team member and work to achieve organizational goals.

SUMMARY

Self-taught programmer with ambition to gain expertise knowledge in software engineering by following the best industry practices, also learning to choose the right tools for the right task to deliver high quality software well tested and clean coded.

TECHNICAL SKILLS

React	Core-Java	Object-Oriented
Bootstrap	HTML5	Programming
Mongo DB	CSS3	PHP
JavaScript	Flexbox	Next.js
NodeJS	Responsive grid system	UI Design
Mui	Rest-API	Puppeteer
React	Agile	C++
testing		
library		

SOFT SKILLS

Time Management	Learning concepts and applying them	Communication
Persistence	to real word	Patience
Problem solving	Design	

WORK EXPERIENCE

Glasswall

a cybersecurity company that keeps organizations secure from file-based threats with leading CDR (Content Disarm and Reconstruction) technology.

- Contributed to react application built to clean malware files at large scales using nextjs, mui, and react hooks.
- Created react components using hooks and Mui component library.
- Created rest endpoints using openapi specification.
- Used react testing library to create robust application.
- Wrote unit test for composite components
- Wrote integration test for whole pages.
- Participated in daily scrum calls and sprint planning
- Contributed to user experience of upcoming projects.

- Used figma to collaborate with user experience teams.
- Used azure devops to update the sprint board and daily updates
- Used github and azure devops to management code.
- Used pipelines to build and deploy code to production.
- Public facing application - <https://cleanroom.glasswall.com/>

Express service import export – Freelance – 1 Year

- Hired to assist with the digital transformation for the successful pharmaceutical business.
- Assisted in marketing effort of bug fixes on the main website.
- Assisted in creating an internal app for cataloging the imported pharmaceutical items using React.
- The catalog app will be accessed by the 50 to 100 partners across the globe to learn about the new medicines available in the market.
- A catalog with 100s of medicine available for Asian and south Asian market.
- The catalog app would have the appropriate marketing material of the pharmaceutical items.
- Implemented functionality to create a request form that would give users a way to request new items available in the market.

Episodic labs – Freelance – 3 months

- Created a web automation tool to pull out the cricket player information from the internet
- used puppeteer to scrap the information like teams, club's player name and other granular information about the players in USA.
- Using the same tool scraped the information of the same players working reputable organization from LinkedIn website to generate quality leads.
- Out of 10,000 players, liaising with sales and marketing team we were able to convert 10% as paying customer for the product sold in USA.
- Technology used: JavaScript, html, CSS, NodeJS, puppeteer and others.
- Created dashboard with the scrapped data to visualize the data using React frontend.
- Participated in daily scrum calls to deliver agreed upon sprint goal on time.
- Wrote integration test for critical part of the system.
