## Summary

Experienced C# .NET Software Developer with 4 years of expertise in developing and maintaining Web and Desktop Applications.

Skilled in:

- Enhancing product functionality based on user stories, fixing defects, improving code quality and security.
- Solid grasp of Object-Oriented Programming (OOP) principles, ensuring robust and efficient code design.
- Quick learning and understanding of legacy code bases.
- Agile development environment, fostering efficient collaboration and iterative development. Regularly providing updates and progress reports in daily stand-up calls and action items for improvement in retrospective.
- Collaborating with QA teams / Architect / Product Owner for quality deliverables.
- Documenting issues and fixes properly for the future reference.

I had career gap from 2015 to 2022 to pursue personal goal of UPSC Civil Services, post which I have been in Industry for last 1 year.

## Experience
