#8085831999

Summary

- 7.6 years of work experience in software, and web product application development.
- Strong proficiency in Angular framework and web technologies such as HTML, CSS, Bootstrap, Angular Material and TypeScript, RxJS, JavaScript.
- Development platform GitHub, AWS
- Experience in developing and managing a variety of user interfaces.
- Implementing web design and development principles to build stable software.
- Collaborating closely with the team to support projects during all phases of delivery.
- Experience working in Agile, Iterative, and Incremental Product Development Life Cycles
- Experience in working with international clients.
- Transitioning towards UI Development while building a skill set in UI Technology and Angular
- Testing to identify bugs and technical issues before and after deploying. Testing with Tools like Best and Jenkins.
- Document bug reports, tickets, and any code changes.
- Monitoring website performance and rectifying backed-related issues.
- Passionate to update my knowledge and skills through continuous self-learning.
- Proficient at grasping new technical concepts and utilizing them in an effective manner.
- Communicating technical issues in an understandable manner to the team and clients.
- Team player with strong analytical and communication skills.
- Experience working with multidisciplinary teams; in business development, strategy, UX, design, content, marketing, and development.
- Experience with building Progressive Web Apps using Angular, including service workers, caching, and offline support.
- Experience in designing and developing web applications using the Angular framework and Progressive Web App technologies.
- In-depth knowledge of digital design and development practices and standards.
- Proficiency in using project management tools and systems such as Jira.
- Excellent written, presentation, and oral communication skills.
- Outstanding time management, productivity, administrative and organizational skills.
- Ensuring smooth delivery of the project

Skills

- Web technologies: Angular, Angular Material, Jhipster, RxJS, Typescript, AngularJS, ReactJS,

JavaScript, HTML, CSS, BootStrap, SCSS,
- Project management Tool: JIRA
- Version Control Tools: GIT
- Database: MySQL, MongoDB
- Build Tools: VS Code

Roles and Responsibilities

- Understanding Client requirements and proposing Enterprise Solutions
- Developing and maintaining complex web applications using the Angular framework
- Participating in the entire software development lifecycle, from planning to implementation and maintenance
- Led and mentored a team of developers to ensure high-quality code delivery.

- Collaborating with cross-functional teams to understand business requirements and translate them into technical solutions.
- Conducting code reviews and implementing best practices to ensure code quality and scalability.
- Optimizing the application for maximum speed and scalability
- Designing and implementing reusable components and modules
- Developing and maintaining RESTful APIs and integrating them with front-end applications
- Troubleshooting and debugging issues in the application and providing effective solutions
- Staying up to date with the latest trends and technologies in front-end development and implementing them in the project where appropriate.

Academic Profile

- ✓ University degree courses
  - o BE (Elctronics And Communication), RGPV, 2015, 6.4 CGPA
- ✓ Higher Secondery
  - o PCM, M.P.Board ,2010 , 55%
- ✓ High School
  - o PCM, M.P.Board ,2006 , 59%

Professional Details

Sr. Software Eng., Netsmartz (JULY 2022 To Present)
I have been contributing as UI developer working on various tiers of Angular13 oriented web based solutions. I am generally tasked to write business logic and managing UI development. I possess good exposure to Jhipster, Angular, Material UI Angular Matrial,RxJS, Typescript, Java Scripts, Html, CSS, Bootstrap

UI DEVELOPER, Rakuten Symphony (NOV 2020 To JUNE 2022)
I have been contributing as UI developer working on various tiers of Angular9,12 oriented web based solutions. I am generally tasked to write business logic and managing UI development. I possess good exposure to *Angular, Angular Matrial, RxJS, Typescript,* Java Scripts, Html, CSS, Bootstrap,

Software Engineer, Galaxy weblinks (FEB 2020 To NOV 2020)
I have been contributing as UI developer working on various tiers of ReactJS/ReactNative/jQuery/Bootstrap oriented web based solutions. I am generally tasked to write business logic and managing UI development. I possess good exposure to Java Scripts, Html, CSS, Bootstrap

Software Engineer, InnoEye Technologies (May 2016 To Jan 2020)
I have been contributing as UI developer working on various tiers of AngularJs/jQuery oriented web based solutions. I am generally tasked to write business logic and managing UI development. I possess good exposure to Java Scripts, Html, CSS, Bootstrap, Angular Material and databases (MySQL)

Projects

---

1. WP (Watermelon)
Watermelon is a platform designed to dig deep and reach the flaming red core of IT systems that look deceptively green on the outside. Our aim is to have humans tell us what they want to achieve, sit back and let our droids (any start wars fans?) do the rest. When the results of the droids' hard work combine with insights that are auto-magically put together in watermelon.

Technology – JHIPSTER, Angular13, *RxJS, TypeScript,* Bootstrap, Angular Material, Html, CSS, JavaScript

2. RCP (Rakuten)
This web-based platform facilitates the creation of solutions that can lead to improvement in operating efficiencies, deep understanding of the network, gain insights into operations and enhance customer experience.

Technology – Angular9,12, Bootstrap, Angular Material, *RxJS,* Html, CSS, TypeScript, jQuery

3. Siteforge (Jio)

Facilitates workflow orchestration, real-time project intelligence, once advanced -only data capture, automated business rule validation, and improved forecasting and integration capabilities.

Technology – AngularJS, Angular Material, Html, CSS, JavaScript, jQuery

4. Foresight (Jio)

This web-based platform facilitates the creation of solutions that can lead to improvement in operating efficiencies, deep understanding of the network, gain insights into operations and enhance customer experience.

Technology – AngularJS, Angular Material, Html, CSS, JavaScript, jQuery

5. Innoeye Website

This web-based platform facilitates the creation of solutions that can lead to improvement in operating efficiencies, deep understanding of the network, gain insights into operations and enhance customer experience.

Technology – Html, CSS, Bootstrap, JavaScript, jQuery
