Flat 2, Vimal Laxmi Apt, Sinhgad Road, Pune

L & T Infotech, Pune — Associate Consultant

July 2019 – PRESENT

15 months

Responsible for estimating user stories in agile methodology, defining impact analysis, identifying risks and proposing risk mitigation techniques.

- Employed **best practices** in person Account automation processing to reduce the platform errors by ~5%
- Designed reusable Lightning components using Aura and LWC frameworks to convert JS buttons, VF Pages into lightning experience.
- Multiple test class failures were observed during each release cycle. Spearheaded the effort to **streamline the test framework** and brought failure rate below 1%.
- Brainstormed long term scalable solutions to enhance overall **system efficiency**
- Worked as a module lead to implement turnkey integration with OCE using **platform events** and kafka micro services
- Led automation process of patient integration with a third party system for creating patient records
- Conceptualized **reusable lightning component** using emp API to troubleshoot incoming/outgoing payloads and reduced dependency over workbench and eclipse - emp connector.
- Revamped major standard object functionalities using **Change Data Capture** process to reduce the queueable/future calls from the triggers
- Responsible for **peer code review** of all the team's components

Accenture, Pune — Application Development Sr. Software Engineer

June 2018 – July 2019

13 months

Worked as key offshore member for North American Media & Entertainment Client.

- Developed custom lightning application for campaign management processing from inception phase
- Drafted **data model and security structure** based on the business requirements for the application
- Built custom applications leveraging Aura components, Apex Classes, Apex Triggers and VF pages
- Developed solution to reduce touch points for driving campaign, campaign activities and segments
- Leveraged **LDS and SLDS** for developing and designing the Aura Components
- Defined application roll out plans for seamless transition of functionality from dev environments to production

Accenture, Pune — Application Development Software Engineer

December 2016 – June 2018

18 months

Received on-the-job salesforce training and applying skills in Agile model of software delivery

- Authored Apex classes and **Asynchronous Apex**
- Coordinated end-to-end production deployment activities
- Worked on **declarative development** tools such as workflow rules, process builders, validation rules, flows.

Accenture, Pune — Associate Software Engineer

August 2015 – December 2016

16 Months
