## WORK EXPERIENCE

### Software Development Engineer III Intugine Technologies

11/2021 - Present

Real-time multimodal supply chain visibility platform

#### Achievements/Tasks

- Led the **Frontend Team** for the Launch of **IntuParcel V2** - Intugine's flagship product for consignment tracking using **NextJs, Redux Toolkit** including **RTKQuery**, and **TypeScript** focused on stability, customization, and performance. Intuparcel tracks 100k+ consignments daily with a new UI which is **4x** times **faster**.
- Implemented the **UI config** for onboarding new users, tailored to their custom requirements. This new config helps to reduce the onboarding process from 3 to 1 day.
- Implemented the **responsive custom table** on top of the **Material UI** which will **increase** or **decrease** the **number of columns based on screen size**.
- Collaborated with product manager to drive feature and design discussions, resulting in a streamlined development process and expedited time-to-market by 20%.
- Provided accurate estimates and mitigated technical risks at both module and product level, resulting in on-time delivery of high-quality software with 40% fewer defects.
- Participated in **code reviews**, provided constructive feedback, and maintained **code quality** standards within the development team.
- Led cross-functional agile teams across the software development lifecycle.
- Utilized Gitlab for version control and deployment process using Jenkins.

### Senior Software Engineer Brillio

09/2019 - 10/2021

#### Achievements/Tasks

- Delivered **AWS Falcon Project** for Amazon, In this project we automated and improved the deal intake and Private Pricing Request creation process.
- Collaborated with the Functional team to discuss and evaluate the feasibility and estimated effort required for new features.
- Mentored and managed a team of 3 (interns and SDE-I), which included task assignments, code reviews, bug fixing, and pair programming.
- Built a **form builder** from the ground up using **ReactJS, JavaScript, HTML, and CSS**, encompassing dynamic component rendering based on conditions and dependent form elements.
- Responsible for creating config to create form builder under the guidance of team lead.
- Implemented UI pages with reusable components in **ReactJS**, and **Redux** using AWS Polaris Framework.
- Involved in discussions with the UX team and Product team.
- Unit testing with JEST and Enzyme.

### Software Development Engineer Nineleaps

09/2017 - 08/2019

#### Achievements/Tasks

- Delivered UAM (User Access Management) similar to IAM of AWS for Tesco client.
- Created UI pages using **Reactjs** with **Redux** as state management.
- Developed multi-select checkboxes, textboxes, and other components using HTML, CSS, and JavaScript, without employing any UI framework.
- Worked on middle-layer APIs using **NodeJs**, and **ExpressJs**.

## SKILLS

Reactjs

Javascript

Typescript

HTML

CSS

NextJs

Redux Toolkit

RTK Query

ExpressJs

NodeJS

MongoDB

Docker

Kubernetes basic

Git

Postman

Jira

## EDUCATION

### B.E Computer Engineering Gujarat Technological University

07/2013 - 06/2017  
7.47 CPI

## ACHIEVEMENTS

### Brillio Special Awards (06/2020 - 06/2021)

Secured "Brillio Special Awards" award for dedication towards the special project in June 2020.

### Brilliant Of the Month (03/2021)
