## **Career Objective:**

A proactive and fast learning individual seeking for growth-oriented opportunity to work as a dynamic Business Analyst/Data Analyst where I can utilize all my Analytical & Statistical skills in the world of Data.

## **Key Skills:**

Business Analysis, Requirement Elicitation, Documentation, SDLC Methodologies, Software Configuration, UAT, Predictive Analytics, Statistical Modelling, Training and Mentoring, Data Analytics, Data Mining, Machine Learning algorithms.

## **Tools & Techniques:**

### **Statistics -**

- Exploratory Data Analysis
- Various Data distribution methods
- Inferential Statistics (Sampling Techniques, Statistical Tests)
- Hypothesis testing
- Data Mining and Data Preprocessing techniques
  - Handling Missing values / Missing value computation
  - Data Normalization
  - Dimensionality reduction
  - Outlier Detections
- Feature Engineering techniques

### **Machine Learning –**

- Supervised and Unsupervised ML
- Classification, Regression and Clustering
- Random Forest, Decision tree, Linear and Logistic Regression
- K- Means Clustering
- Dimensionality Reduction technique (PCA, Correlation check, Zero Variance check)

Data Bases: SQL

Tools: Python, Jupyter Notebook, Microsoft-SSMS, Power BI

Operating systems: Windows, Unix

BA Tools and Techniques: Lucid Chart, MS Word, Bugzilla, Postman, SDLC methodologies, Workflow Migration tool, Excel, Waterfall, UML, Analytical Thinking, Problem solving and approach, Power BI.

## **Work Experience:**

Working as a “**Product Specialist (Business Analyst)**” from Aug-18 to till date with experience in Web Based SAAS Application and Environment.

### **Project 1: “Immidart Lite”**

This Application is a compact immigration application designed to address the challenges in the immigration space. It is mainly targeted to Small and Mid-Sized organization to automate the Process of immigration. A completely cross global tool helps you transform your immigration processes and stay business ready. With user friendly interface employees can seamlessly navigate and initiate Visas, also keeping updated with regular updates and alerts.

### **Project 2: “Immidart Enterprise”**

Enterprise application is exclusively designed for the global needs of corporate Immigration. The application has several inbuilt engines that provide stability & customization which enables quicker modification and deployment. The application has built on Microsoft platform and can be easily integrated with various DB's and CRM applications. A simple, compliant, and most transparent application any corporate and immigration professionals are desired to have.

### **Roles & Responsibilities:**

- Serving as a liaison between the programmers and internal business entities in designing and implementing functionalities.
- Experience in co-coordinating with business and IT across all phases of software development life cycle.
- Engage with client to gather Software Requirements/Business rules and ensure alignment with development teams.
- Analyzing the requirements and documentation of the Process Flows using Swimlane diagrams.
- Translate stakeholder requirements into different tangible deliverables such as functional specifications, Use cases, and Workflow/Process diagrams.
- Creation of User stories
- Analyze client's requirements and processes through Documental analysis, workshops, and workflow analysis.
- Prioritization and Estimation of the requirements
- Identify and reconcile errors in client data to ensure accurate Business requirements
- Designed process flows, Functional Requirement Document (FRD)
- Conduct testing including Functional, User Acceptance and Integration to verify the client's needs are met.
- Working with Development team to get the bug fixes, performing end to end all Positive and Negative UAT of complete solution.
- Preparation of Functional User manuals of the entire application to the clients.
- Involved in analyzing the Change requests (CR) and coordinating the change required with Development and Testing team on Effort estimation and receiving client sign off.
- Product demonstration to the client and Client's internal stake holders.
- Create and maintain issue logs, Meeting minutes, Meeting schedules, Project summaries and updates.

- Work on Production issues as incidents
- Ongoing support to client on issues, circulating Bi-weekly and Weekly trackers on all the pending actions.
- Creating Reports from Power BI
- Identifying the product gaps and providing approach on the same.
- Involved in the Application Enhancement at different levels.

**Education:**

- **B.E (EEE)** from RYMEC, Ballari in the year of 2017.
- **PUC (12<sup>th</sup> std)** from Govt Xmpl PU College, Ballari in the year of 2013.
- **SSLC** from S G high school, Ballari in the year of 2011.

**Personal Details:**

Date of Birth: 01-06-1995

Gender: Male

Marital Status: Unmarried

Nationality: Indian

Passport: Yes

Languages: English, Kannada, Hindi, Telugu
