Career Objective

To secure a challenging role in Application Development that allows me to leverage my technical expertise and contribute to the growth of the organization.

Summary

- Having about 9.2 years of Industrial Experience
- Expertise in .Net, C#.
- Acquired knowledge on selenium, Asp.Net MVC, Asp.Net Core Web API, PowerShell Script, VBScript.

Technical Skills

Operating Systems	Windows 7, Windows 8, Windows 10
Platform	Microsoft.NET
Programming Languages	C#.Net
Technologies	Asp.Net MVC, Asp.Net Core Web API, VBScript, NUnit,ECMA Script,PowerShell Script
Database	MS-SQL 2005,2012, DB2
Tools and Utilities /IDE	Visual Studio 2015 /2017/2019
Version Tools	GitHub, Harvest Version Control, Tortoise SVN

Project Details

Title	MAG NON-SAP APPS - Operational Performance Monitor Application
Role	Information Technology Analyst C2
Duration	July 2022 – Present
Team Size	4
Technologies	C#.Net, MS SQL Database, Asp .Net Core Web API,PowerShell Script

Project Description: MAG is a company which operates airports in the UK. Operational Performance Monitor (OPM) application is developed by TCS for MAG to provide business intelligence to provide insights and help facilitate improved operational management within Manchester airport.The application processes the Airport Scanners data and displays Actual business performance data - Passenger,Queue Time & Check-in & Immigration data. This data is compared against the planned performance data for better planning .The application is built on .Net framework 3.5. based on 3 tier architecture such as Business layer, Data access layer, web layer and services layer. The application has three services to import data from feeds & process the data, Job scheduling service to fetch and display the processed data, Nightly service to fetch and display the correction data.

Roles and Responsibilities:
- Requirement analysis, Enhancement changes on airport lane ,scanner devices addition and exclusion,Live prod deployment
- Development - Power BI migration
- Perform Peer review
- Release to business acceptance testing

Project Details

Title	HMS - Verifications IT EDI Scraper
Role	Developer
Duration	January 2015 – June 2022
Team Size	4
Technologies	C#.Net, Asp .Net MVC, Selenium WebDriver, DB2 Database, Asp .Net Core Web API

Project Description: HMS is a healthcare service company which provides coordination of benefits and services to government (Medicaid and Medicare) based insurance as well as third party liabilities. So, this application is completely based on verifying the insurance policies belonging to third party insurance companies. This application mainly focuses on extracting policy related information from the insurance websites. This application is built on .Net framework 4.5.2 based on 3 tier architecture such as Business layer, Data access layer and Common layer with integration of selenium WebDriver to automate the website to scrape the information.
