SUMMARY

A Full-Stack developer with 2+ years of experience in the Financial domain. Extensively worked on Front-end, Back-end(MERN stack), and DevOps in my current startup.

EXPERIENCE

Full-Stack Developer

Auquan 06/2018 - Ongoing Bengaluru

As the first developer of the **Auquan** team got an opportunity to work on every aspect of our startup needs.

- In **Techstars London** accelerator program raised \$1.1M in seed round by Episode 1
- Worked on **Portfolio Activity Manager** to help Asset Manager to invest wisely
- Build a **quant-quest** platform for student and professional data scientists to learn, compete in financial data science problems
- Setting up a development life cycle in the team with GitLab pipeline
- Setting up Kubernetes for staging and production app deployment
- Integrating LinkedIn SSO, Google Analytics, segment, and SendGrid in applications

Student Intern

Oracle 06/2017 - 05/2018 Bengaluru

- Writing Automation tests for RPAS utilities to test RPAS (RPAS Fusion client for Retail Demand Forecasting) applications in Perl and shell scripts.
- Interacting with the Build team and Development team for issues and following up on bugs.
- Checking pre-production builds in Jenkins and Running Automated tests.

Teaching Assistant

MIT, Manipal 10/2016 - 01/2017 Manipal

- Doubt clearance sessions and Reinforce lessons presented by lectures, one-on-one or in small groups with students(for first-year students)
- Assisting student on Object-Oriented Programming, Data Structure, and Algorithms
