EXPERIENCE

ASSOCIATE SOFTWARE ENGINEER

(July 2018 – Present)

AMDOCS, INDIA

– Pune, India

Role : Development of new REST services and UI component, Manage Build and Deployment

Project : AT&T Billing & Payments

Description:

1. The project is to manage and handle payments of customers. This project support real time payments and batch payments. Customers can schedule their payments for future.

Responsibilities:

- Development of new Micro services using Java and Spring Boot.
- Development of new UI component using angular.
- Modifying Existing Application.
- Handle and fix the bugs in existing project.
- Handle build and deployment of software.
- Setup a Git Repository for application.
- Develop new build pipeline.

2. The project Credit Decision Engine (CDE) is planned to house all rules for decision in one system and provided a single front-end, to request a credit.

We are calling four micro services to get decision from machine learning based on customer account.

Every day one batch job will execute and call Retrieve Mapped Object micro service and load data into database. Load the Property table and Other Reference table in Singleton object to use in whole application at server start. Worked on Peer Code Review, Design Document, UT and Co-ordinate with testing team.
