### PROFESSIONAL EXPERIENCE

#### *Oracle, Commerce Cloud*

##### **Senior Software Developer**

*May-18-till date*

- Enhanced the card payment framework to **support storing cards** against user profile and reusing stored cards for order payments.
- Created a new **OOTB payment gateway to support in store payment** for Buy Online Pickup-in Store orders, handling authorization and void transactions. Also added the functionality to replace the in-store payments with the actual payment method used in store to complete payment.
- Created the **framework to support mixed currency orders**, where the shopper can pay for an order using loyalty points and monetary currency.
- Conducted training sessions followed by evaluation for new joiners.

##### **Software Developer**

*Apr-16 – Apr-18*

- Created a **new integration for Oracle Commerce Cloud with Worldpay payment gateway using NodeJS and Express framework**. This integration was first of its type, to serve as a reference implementation for customers to extend or customize the backend services provided by Oracle Commerce Cloud. Bagged “**Star Performer Award for Outstanding Contribution**” for the same.
- Enhanced Cloud Commerce adapter in Oracle Integration Cloud’s, another Oracle CX product, to support download and upload of files over http. This helped in importing and exporting data in bulk.
- Created new webhooks to request and update quotes for Commerce Cloud – CPQ integration.
- Added new plugins for Bulk import and export of profiles and accounts to and from Commerce Cloud.

#### *Cognizant*

##### **Programmer Analyst**

*Jun-14-Mar-16*

- **MetLife-Retail Advisor**  
Worked on a migration project to move the functionality of an existing application interface to a new portal using web services using the WebSphere Message Broker (WMB) for integration. **Developed SOAP and MQ based web services** which involved, replicating and enhancing the existing functionality of the backend application using XSLT’s and ESQL in WebSphere Message Broker.
- **Central Reservation System.**  
Developed a hotel reservation system as a training project providing following functionalities  
Add and Delete Hotels, create and modify reservation, search and payment.

### EDUCATION

#### ***BIRLA INSTITUTE OF TECHNOLOGY, MESRA, RANCHI***

Bachelor Of Engineering in Computer Science and Engineering.

CGPA: 7.9/10

### TECHNICAL SKILLS

- JAVA, J2EE, NodeJS, Javascript, XSLT, MySQL, ATG Commerce, Oracle Database, Docker, Git.
