

# SHAHID SHEIKH

## VISUALISATION & SEARCH DEVELOPER

### MY OBJECTIVE

6+ years of total IT experience. Tableau Developer with 4+ years of experience in Business Intelligence. Proficient in BI Dashboards and data visualization with expertise in Data Analysis, UI Designing solutions with impactful representation. Well-informed in Tableau desktop, Server and Data preparation tool & troubleshooting for data building and analysis.

Phone: +91 8421004036

Email: [shahid.sheikh026@gmail.com](mailto:shahid.sheikh026@gmail.com)

Address: Besa, Nagpur

440037

## PROFILE

- 6+ years of total IT experience in Interactive Designing, Visualization, and dashboard development in BI Tools.
- Strong experience developing, testing, and delivering complete visualization solutions
- Experience building **Tableau dashboards** to show insights of different portfolios, dashboards, and customer-level detailed reports for relational managers, directors, and the vice president
- Experience in data analysis, modeling, and design
- Creating and editing visual content including **maps, charts, and graphs**.
- Transforming data sets, quantitative and qualitative analysis into compelling visuals.
- Providing visual, technical and editorial guidance.
- Provide support in handling License and User level access on **Tableau server**.
- Ensure data accuracy by quality checking each analysis prior to publishing
- Dealing & providing solutions on various **export techniques** that requires to share output with multiple clients.
- Effectively communicate actionable insights to category leads supporting their goals and objectives
- Prepare executive level presentations to clearly articulate results of complex mathematical analyses
- Create visually appealing and interactive data visualizations that drive action within the business

## PROJECTS

- **GATWICK AIRPORT** | Tableau Developer & Support  
**DOMAIN:** Travel, Finance, Revenue  
**TOOLS:** Tableau, Tableau Server, Tableau Prep, Excel

### RESPONSIBILITIES:

- Understand the requirement and create the data source which can be utilized efficiently for any further Report Development.
- Build and apply logics to create calculations and workarounds which meets the requirements.
- Analyzing data/Data source and provide effective data modelling and analytical solutions.
- Combine data flow and analysis with impactful data visual techniques required
- Providing multiple functionality, like multiple selection, Layouts, maintain data visibility and understanding
- Make dashboard interactive for user by using filters, parameter and other interactive objects.
- Perform Query optimization and improve performance of the reports and dashboards

## PROFESSIONAL SKILLS:

### TABLEAU

### TABLEAU PREP

### TABLEAU SERVER

### THOUGHTSPOT

### POWER BI

### MS EXCEL

## EDUCATION

### Degree in INFORMATION TECHNOLOGY (2016)

Pursued engineering from RTM Nagpur University with **65.26%**

### Diploma in INFORMATION TECHNOLOGY (2013)

Completed Diploma in INFORMATION TECHNOLOGY from MSBTE with **66.50%**

### SSC (2009)

Cleared Schooling from St. Anne's High School, Warora with **68.76%**.

## WORK EXPERIENCE

Sept'21 – Present

### Tableau Developer

ZSAH Managed Technologies, Bangalore

Dec'17 – Aug'21

### BI Consultant, Tableau

Nice Software Solutions Pvt. Ltd. Nagpur

Dec'16 – Dec'17

### Graphic Designer

Promarc Software Pvt. Ltd. Nagpur

## SKILLS

### CREATIVITY

### TEAM PLAYER

### ORGANIZATION

➤ **ADDISON LEE** | Tableau Developer**DOMAIN:** Travel**TOOLS:** Tableau, Databricks, Postgres, MS PowerPoint, Excel**RESPONSIBILITIES:**

- Understand the requirement of client and analyze the data.
- Understand the data to create the measures which required to meet the product / final Report.
- Work with live connect and optimize the performance of the dashboard by introducing parameter as data source filters to live connection.
- Analyzing data and provide effective data flow and analytical solutions.
- Combine data flow and analysis with impactful data visual techniques required
- Create Impactful visuals and connect with every other end story to have complete data story flow.
- Providing multiple alternate layout option for implementing functionality, like multiple selection, Layouts, maintain data visibility and understanding
- Make dashboard interactive for user by using filters, parameter and other interactive objects.
- Designing dashboards to implement the solutions suggested with impressive look and feel

➤ **PREMIER INN** | Tableau Developer**DOMAIN:** Hospitality**TOOLS:** Tableau, Python, MS PowerPoint, Excel**RESPONSIBILITIES:**

- Create a Dashboard which shows the day wise price analysis for Premier Inn with respect to its other competitors.
- Include python scripts to get the correct coordinate of the user input names for location.
- Utilize python generated coordinates to get near by hotels and point of interest depending on the dynamic radius passed using parameter.
- Combine data flow and analysis with impactful data visual techniques required
- Create Impactful visuals and connect with every other end story to have complete data story flow.
- Providing multiple alternate layout option for implementing functionality, like multiple selection, Layouts, maintain data visibility and understanding
- Improve the performance of the dashboards by optimizing query and functionality tuning.

➤ **SAINSBURRY** | Tableau Developer**DOMAIN:** Property Development & Sales**TOOLS:** Tableau, Python, MS PowerPoint, Excel**RESPONSIBILITIES:**

- Analyzing data and provide effective data flow and analytical solutions.
- Combine data flow and analysis with impactful data visual techniques required.
- Analyzed the sample data in excel format provided by the client and created filters, parameters, calculated fields and visualizations to build the appealing and interactive dashboards.
- Combine data flow and analysis with impactful data visual techniques required
- Create Impactful visuals and connect with every other end story to have complete data story flow.
- Providing multiple alternate layout option for implementing functionality, like multiple selection, Layouts, maintain data visibility and understanding
- Improve the performance of the dashboards by optimizing query and functionality tuning.

➤ **HERMES DASHBAORD** | Tableau Developer**DOMAIN:** Logistics**TOOLS:** Tableau, Figma, MS PowerPoint, Excel**RESPONSIBILITIES:**

- Understand the requirement of client and analyze the data.
- Collaborate the Hermes given data with Eqolines (Tableau Extension) data in order to merge them in one dashboard
- Analyzing data and provide effective data flow and analytical solutions.
- Combine data flow and analysis with impactful data visual techniques required
- Understand the Geometry (shape files) to drive whole dashboard through Map selection and drill down.
- Providing multiple alternate layout option for implementing functionality, like multiple selection, Layouts, maintain data visibility and understanding
- Make dashboard interactive for user by using filters, parameter and other interactive objects.
- Designing dashboards to implement the solutions suggested with impressive look and feel

➤ **FOOTBALL GROUND NEAR YOU** | Tableau Developer**DOMAIN:** Travel**TOOLS:** Tableau, Figma, MS PowerPoint, Excel**RESPONSIBILITIES:**

- Designed the user experience for end user to calculate the cost estimation for the required product with ease
- Convert traditional Excel reports to Tableau interactive dashboards
- Analyzed the sample data in excel format provided by the client and created filters, parameters, calculated fields and visualizations to build dashboards that could be printed as excel reports or PDFs
- To improve the performance of the dashboard by using optimized visualization, filters and calculated fields.
- Completed user research to identify opportunities for improving data visuals representation.
- Understanding client requirement in terms of Data flow, Dashboard layouts, UI & graphics.
- Developing the dashboard using Tableau calculations and data manipulation techniques.

➤ **NEAREST AND QUIETEST BEACHES** | Tableau Developer**DOMAIN:** Travel**TOOLS:** Tableau, Figma, MS PowerPoint, Excel**RESPONSIBILITIES:**

- Analyzing data and provide effective data flow and analytical solutions.
- Combine data flow and analysis with impactful data visual techniques required.
- Analyzed the sample data in excel format provided by the client and created filters, parameters, calculated fields and visualizations to build the appealing and interactive dashboards.
- To improve the performance of the dashboard by using optimized visualization, filters and calculated fields.
- Use to effective chart and analytical representation to overcome data view challenges.
- Providing multiple alternate layout option for implementing functionality, like multiple selection, Layouts, maintain data visibility and understanding.
- Designing dashboards to implement the solutions suggested with impressive look and feel

➤ **FIFA Dashboard** | Tableau Developer**DOMAIN:** Sports**TOOLS:** Tableau, Excel, Figma, MS PowerPoint**RESPONSIBILITIES:**

- Analyze data to create effective storyboarding and data flow for dashboards.
- Understanding and gathering client requirement to contribute in Ui for the dashboards.
- Developing Data flow and application flow to convert lengthy dataset into impactful and meaningful dashboards.
- Create filters, parameters, calculated fields, and visualizations to build the appealing and interactive dashboards and reports according to the requirement.
- Establish and promote data visuals guidelines, best practices and standards to overcome the huge data representation challenges.
- Develop data visual and combined dashboards which deal with mass data and integrate in data visual effectively.
- Collaborate with cross-functional teams throughout the design process
- Stay abreast of UX trends and look for creative ideas and inspiration in parallel analogous worlds
- Staying in the loop and on top of the latest standards, changes, trends in the data visualization field

➤ **Indian Coal Mines** | Tableau Developer**DOMAIN:** Retail**TOOLS:** Tableau, Excel, MS PowerPoint, Illustrator**RESPONSIBILITIES:**

- To meet the challenge of blending data with visual to achieve out of the box design.
- Completed user research to identify opportunities for improving data storyboarding presence.
- Create filters, visualizations to build the appealing and interactive dashboards and reports according to the requirement.
- Understanding client requirement in terms of Data flow, Dashboard layouts, UI & graphics.
- Develop single screen dashboard with layouts including unique concept and Ui Design
