PROJECTS

➤ Bayer

Bayer is a German multinational pharmaceutical and Life Sciences Company and one of the largest pharmaceutical companies in the world. Its areas of business include human and veterinary pharmaceuticals, consumer healthcare products, agricultural chemicals, seeds and biotechnology products.

- I started working on Bayer-Vision, an enhancement project of existing Monsanto project. It is an order management/ inventory management project.
- As a developer, I had worked on user stories and make functionality changes based on the requirement provided by the client.
- Worked on return business module.
- It uses Glovia OM, I have worked on Sales Order, Return and Inventory Management.
- Worked on Rest, Batch classes and mostly apex to handle various business scenarios with Visualforce as the UI.

➤ **Syngenta CropEdge (Steady State)**

Client is a Global Leader at providing essential inputs to growers: Crop protection, seeds, seed treatment and traits. Their goal is to be the leading global provider of innovative products for every step of the agronomic process and to understand their interplay and optimize the results for growers and the food chain. The objective of this project is Glovia OM implementation with Salesforce.com.

- As a developer, I had worked on SRs (service requests), make functionality changes based on the requirement provided by the client and deployed the changes.
- Worked on creating/editing and approvals of the Replant and Grower FOC Orders.
- It uses Glovia OM, I have worked on Sales Order, Purchase Order and Return.
- Worked on handling all kinds of defects and change requests including code changes by active interaction with Clients.

➤ **Syngenta CropEdge UI/UX**

Client is a Global Leader at providing essential inputs to growers: Crop protection, seeds, seed treatment and traits. Their goal is to be the leading global provider of innovative products for every step of the agronomic process and to understand their interplay and optimize the results for growers and the food chain. The objective of this project is Glovia OM implementation with Salesforce.com.

- Worked on building up the complete module for the Grower Business, which includes creating/editing of Growers and Grower Orders.
- Worked on creating/editing Grower Quotes and conversion of the Quotes to Order.
- Worked on sales order process for creating/editing sales orders for resellers.
- Worked on the Back Order module of the Reseller Business.

➤ **The Finn Group**

Client is Australia's leading business broker with a clear mission to help business owners to buy or sell their businesses. Their goal is to facilitate smooth transitions by combining technologies with traditional methods to attract potential buyers for business.

- Using Salesforce Lightning Design System, create a Lightning Page/App which enables users to schedule a meeting with one or more person Accounts related to an Account and linked to a Salesforce Record.
- User should be able to specify whether they want System to send invitation email/ notification to the attendees once meeting has been scheduled by the user or not.
- Created workflow, validation rules and Email Alerts as per client requirement.

➤ **Boswen**

Client is Australia's leading business in security solution industry. They provide one-stop and tailor made solutions which effectively support the client's business requirement.

- Worked on the requirements provided by real time users by raising a case.
- Worked on creating/redesigning lightning components as per requirement.
- Worked on workflow, process builder and validation rules.
- Created Email Alerts and Triggers as per client requirement.
